

Contents

1	General Introduction	10
1.1	Introduction	10
1.2	Objective	10
1.3	Thesis Structure	10
2	Basic Concepts	14
2.1	Introduction	15
2.2	Edge Computing Fundamentals	15
2.2.1	Definition and Characteristics	15
2.2.2	Edge Computing Architecture	15
2.2.3	Edge vs Cloud Computing Trade-offs	15
2.2.4	Resource Constraints in Edge Environments	15
2.3	Function-as-a-Service (FaaS)	15
2.3.1	Serverless Computing Model	15
2.3.2	FaaS Architecture and Characteristics	15
2.3.3	Container Lifecycle Management	15
2.3.4	Cold Start and Warm Start Mechanisms	15
2.4	FaaS-sim Integration	15
2.4.1	Opportunities in FaaS-sim Convergence	15
2.4.2	Challenges in FaaS-sim Deployments	15
2.4.3	Heterogeneous Device Management	15
2.4.4	Network Dynamics and Latency Considerations	15
2.5	Internet of Things (IoT) and Smart Cities	15
2.5.1	IoT Architecture and Communication Models	15
2.5.2	Smart City Applications and Use Cases	15
2.5.3	IoT Workload Characteristics	15
2.5.4	Real-time Processing Requirements	15
2.6	Simulation and Modeling Principles	15
2.6.1	Discrete Event Simulation	15
2.6.2	Trace-driven vs Model-driven Approaches	15
2.6.3	Performance Metrics and Validation	15
2.7	Conclusion	15
3	State of the Art	34
3.1	Introduction	35
3.2	FaaS Simulation Frameworks	35
3.2.1	Cloud-Centric FaaS Simulators	35
3.2.2	Edge-Oriented FaaS Simulators	35

3.3	Comparative Analysis Framework	35
3.3.1	Evaluation Criteria Definition	35
3.3.2	Simulator Assessment Methodology	35
3.4	Simulator Evaluation Results	35
3.4.1	Cloud-Centric Simulator Analysis	35
3.4.2	Edge-Oriented Simulator Analysis	35
3.5	Smart City IoT Applications in FaaS-Sim	35
3.5.1	Traffic Management and Monitoring	35
3.5.2	Environmental Sensing and Analytics	35
3.5.3	Public Safety and Emergency Response	35
3.5.4	Accident Prevention Systems	35
3.6	FaaS-Sim Research Landscape	35
3.6.1	Distributed Scheduling Challenges	35
3.6.2	Container Orchestration at the Edge	35
3.6.3	QoS and SLA Management	35
3.6.4	Heterogeneous Resource Management	35
3.7	Synthesis and Research Gaps	35
3.7.1	Simulator Capability Matrix	35
3.7.2	Identified Research Gaps	35
3.7.3	Smart City Simulation Requirements	35
3.8	Discussion	35
3.8.1	Simulator Selection Rationale	35
3.8.2	faas-sim as Primary Choice	35
3.8.3	Limitations and Future Needs	35
3.9	Conclusion	35
4	Conclusion	66
4.1	Research Summary	66
4.2	Key Findings	66
4.2.1	Simulator Comparison Results	66
4.2.2	FaaS-Sim Simulation Challenges	66
4.2.3	Smart City Application Requirements	66
4.3	Research Contributions	66
4.3.1	Comprehensive Simulator Evaluation	66
4.3.2	FaaS-Sim Modeling Framework	66
4.3.3	Smart City Use Case Analysis	66
4.4	Limitations	66
4.5	Future Research Directions	66
4.5.1	Advanced FaaS-Sim Simulation Models	66
4.5.2	Real-world Validation Studies	66
4.5.3	Extended Smart City Scenarios	66
4.6	Closing Remarks	66
	Page Distribution	67
